MY
JOB?**

Well, maybe...

ChatGPT 4o ▾

how you can do it:

dax

Copy code

```
Rolling 13 Weeks Sales =  
CALCULATE(  
    [Sales Amount],  
    DATESINPERIOD(  
        'Date'[Date],  
        LASTDATE('Date'[Date]),  
        -13,  
        WEEK  
    )  
)
```

Try AI in Fabric

Increase productivity with Copilot in Fabric

Use conversational language with Copilot in Fabric to create dataflows and pipelines, write SQL, and more.

Get AI-driven insights

Get additional insights with built-in AI in Power BI and go from insights to actions with Data Activator.

Generative AI on your data

Enrich your data using generative AI or build custom generative AI experiences.

LEARN & GROW

Change your mindset (to DataOps + AI)

From	To
Change Fear	Change Velocity
Manual Operations	Automated Operations
Hope for Quality	Integrated Quality
Hero Mentality	Repeatable Processes
Tool Centric	Code Centric
Vendor Lock-in	Diverse Tools
Fear AI	Make AI your advantage

Pawel's 10 rules for cloud analytics

1. Learn systematically. Deep dive knowledge is required occasionally.
2. Know the limitations of products/workloads and their integration.
3. The way to implement things may differ from on-premises.
4. Automate things as much as possible.
5. Practice “everything as a code”.
6. Understand pricing and learn how to optimize billing.
7. Do NOT assume solution architecture will be static/fixed.
8. Test and fail often.
9. Be curious of different vendors.
10. Always assume things can go wrong.
